i PROFILE

Throughout a diverse professional background, I have learned well what it means to:

- Have patience in problem-solving,
- Be linguistically precise,
- Be self-reliant,
- Work effectively with a team.

I have helped several companies and teams refactor their thinking and create new processes to improve efficiency and consistency, and I would love to have the opportunity to do the same with yours.

💻 TECHNICAL SKILLS

- MEAN (JavaScript, TypeScript, Angular, Node, Express, MongoDB)
- C# (.NET Core with MySQL, Entity)
- Python (Django with SQLite, Flask with MySQL)
- Web Application Fundamentals (HTML, CSS, JavaScript, JQuery, AJAX, Bootstrap, etc.)
- Git (Primarily Used Github. Comfortable with committing, pushing, pulling, reverting, ignoring, branching, forking, and MERGING.)
- AWS (Deployment)

📁 PROJECTS

Take a look at some of the projects I have proudly done both independently and as part of a group. Project overviews can be seen on my portfolio website:

🎓 EDUCATION

Southern Utah University, 2015
Bachelor of Science, Mathematics
Graduated Summa Cum Laude

Coding Dojo, 2018
Triple Black-Belt in Python, C#, and MEAN

💼 WORK EXPERIENCE

ICSD, 2016-2018 - High School Math Teacher

Teaching gave me an incredibly deep understanding of logarithmic, quadratic, and exponential functions commonly referred to when talking about space/time complexity. I also became well-versed in having to articulate my thoughts in a variety of ways to impress upon each student what I was trying to convey.

Wells Fargo, 2014-2016 - Personal Banker

After working as a Teller for about 6 months, I was promoted to a Personal Banker. As a banker, my job was primarily to examine each client's financial situation, identify the dilemma therein, and assist the client in overcoming this dilemma, while also (legally) meeting the intense sales expectations that Wells Fargo has since abolished. This experience also taught me to be precise and pay close attention to detail as I examined countless legal documents.

Sub Zero, 2012-2014 - Area Manager

Starting as a normal crew member, I was promoted to Shift Leader, then to General Manager. As General Manager and at the owner's discretion, I established new procedures that provided a more consistent product for the customer and cut costs for the business. Happy with my work, the owners promoted me to Area Manager of Southern Utah. This position also gave me the opportunity to manage crew members to ensure efficiency, among other things. That includes hiring, firing, scheduling, training, and working alongside employees.

🎯 GOALS

- To pursue a Master's Degree program in Computer Science through Georgia Tech. I meet the current qualifications for this program, and plan to begin next fall.
- To purchase a home in the Greater Seattle Area next year, to hopefully stay as a permanent resident.
- To work in a position in which I get to exercise my mind, using resources and logic to solve problems.
- To be a part of a team where I can contribute while also having the opportunity to learn from my colleagues and their strengths.
