PROFILE

Throughout a diverse professional background, I have learned well what it means to:

- Have patience in problem-solving,
- Be linguistically precise,
- Be self-reliant,
- Work effectively with a team.

I have helped several companies and teams refactor their thinking and create new processes to improve efficiency and consistency, and I would love to have the opportunity to do the same with yours.

TECHNICAL SKILLS

- MEAN (JavaScript, TypeScript, Angular, Node, Express, MongoDB)
- C# (.NET Core with MySQL, Entity)
- Python (Django with SQLite, Flask with MySQL)
- Web Application Fundamentals (HTML, CSS, JavaScript, JQuery, AJAX, Bootstrap, etc.)
- Git (Primarily Used Github. Comfortable with committing, pushing, pulling, reverting, ignoring, branching, forking, and MERGING.)
- AWS (Deployment)

PROJECTS

Take a look at some of the projects I have proudly done both independently and as part of a group. Project overviews can be seen on my portfolio website:

www.mattselden12.com

View the source code of these projects, along with other projects I have contributed to:

EDUCATION

Southern Utah University, 2015

Bachelor of Science, Mathematics
Graduated Summa Cum Laude

Coding Dojo, 2018

Triple Black-Belt in Python, C#, and MEAN

WORK EXPERIENCE

ICSD, 2016-2018 - High School Math Teacher

- Gained an incredibly deep understanding of logarithmic, quadratic, and exponential functions commonly referred to when talking about space/time complexity.
- Became well-versed in having to articulate my thoughts in a variety of ways.

Wells Fargo, 2014-2016 - Personal Banker

- Promoted to Banker from Teller after just 6 months.
- Taught me to be precise and pay close attention to detail as I examined countless legal documents.
- Worked under intense sales expectations that Wells Fargo have since been forced to abolish.
- Position involved examining each client's financial situation, identify the dilemma therein, and assist the client in overcoming this dilemma.

Sub Zero, 2012-2014 - Area Manager

- Worked my way up through 3 promotions to become Area Manager from entry level crew member.
- Established new procedures that provided a more consistent product for the customer and cut costs for the business.
- Position included managing crew members to ensure efficiency, training, scheduling, hiring, firing, developing new products, and working alongside employees.

GOALS

- To pursue an online Master's Degree program in Computer Science through Georgia Tech. I meet the current qualifications for this program, and plan to begin next fall. This will be done solely on my own time.
- To purchase a home in the Greater Seattle Area next year, to stay as a permanent resident.
- To work in a position in which I get to exercise my mind, using resources and logic to solve problems.
- To be a part of a team where I can contribute while also having the opportunity to learn from my colleagues and their strengths.
